

The smallest detail can turn a good job into a great job – such as simple timber mouldings. Richard Burbidge has hundreds to choose from, decorative, architectural and ornamental, all available from stock and naturally of the highest quality. So whether you just want a professional finish or a change of style, we'll have what you're looking for.

The following products feature in this image:

Product code	Description
FB376	Cover – Hockey
FB360	Glass Bead
FB363	Quadrant
FB373	Scotia
FB200	Broken Ogee
Various	Stripwood

Mouldings

The finishing touches

Decorative mouldings

Even the simplest moulding can add interest, a design flourish or character to a room. And with a huge choice of decorative mouldings in a total of 16 different finishes from pine to aluminium, the Richard Burbidge range is one of the country's largest.

Angles – Used on external and internal corners to hide minor errors and screw fixings. Ideal to cover rough edges on worktops and shelves and where two boards meet.

Covers – D-Shape & Half Round Covers. Traditionally used to cover the edges of sheet material such as chipboard and blockboard. These mouldings are also ideal for finishing trims. Perfect for adding a smooth edge to shelves, worktops or cladding, where cut or just in need of the finish.

Hockeys/Covers – Ideal finishing trims. Perfect for adding a smooth edge and lip to shelves, worktops or cladding. Great for edging and lipping man-made boards such as MDF.

Coving – Used to conceal the join between wall and ceiling and creating the final touch of detail to a room. Using coving also softens the square edge of rooms.

Decorative – Used as decorative trims or adding final details and finishing touches to walls, ceilings or even furniture.

Dowels – Generally used to reinforce woodworking joints, as a rail, curtain pole, broom handle and great for plugging screw holes. Available in a range of sizes and woods.

Picture Frame – A range of profiles to enable you to make bespoke sized picture frames, mirrors or wall features.

Glass Beads – Typically used to hold glass in place on windows and doors using different glass beads add the defining detail to any project.

Plastic & Aluminium – A range of trims offering low maintenance solutions. Use as edgings, lippings and general problem solvers to finish a job.

Quadrants – Used to bridge the gaps in internal corners. Ideal for covering expansion gaps on wood flooring and between timber windows and window sills. An alternative solution to quadrants in a convex format, available plain or decorative in a selection of woods and finishes.

Scotia's – Decorative trims used to cover gaps and rough joins in internal corners. An alternative solution to quadrants in a concave format, available plain or decorative in a selection of woods and finishes.

Stripwood (PSE) – Straight, planed and square edged (on two sides), our strip wood is versatile enough to be used for everything from support battens and boxing in pipework to building a bathroom cupboard!

Miscellaneous – Our special range of mouldings with distinctive shapes for distinctive projects around the home - including Door stops, Corner joints, Pigs Ear and Mopstick shaped handrails.

Bulk Packs – A selection of our top selling lines are available as bulk packs.

For ease of identification, the colours shown here relate to those on the mouldings boxes in-store.

Architectural mouldings

This is where you can really make a difference to any job, adding a superb quality finish whether it's a house, hotel or even a hospital.

Architectural mouldings – skirting boards, dado rails, and cornices – can be found in any residential or commercial building. Usually, they just blend in; but they can do so much more. A change of skirting can add real character; a dado can define a different colour or texture; a cornice or picture rail can make a high ceiling feel lower.

Our architectural range combines all of our experience, skill and passion to produce a choice of styles from Traditional to Contemporary.

The following products feature in this image:

Product code	Description
FC559	White Oak Skirting
FC602	White Oak Architrave
FC434	Pine Skirting
FC750	Architrave

FB1012	White Oak Quadrant

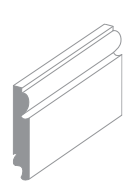

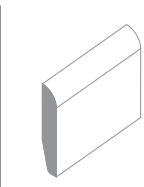

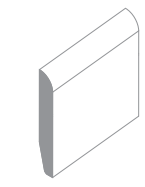

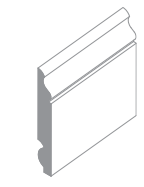

Architectural mouldings

Trade Classics

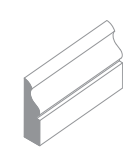

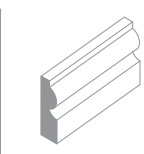

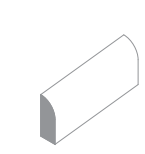

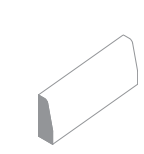

With a choice of classic skirting and architrave profiles – torus, ogee, chamfered and bullnose, together with two sizes of dual-faced skirting boards – the Trade Classics range is fully finished in satin white paint to help save time in completing the job to the highest standard.

Dual faced skirting board

Architectural mouldings

Contemporary

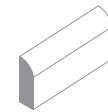

Modern styles, clean lines and simple profiles are the hallmarks of our Contemporary mouldings, with three ranges to choose from: Concept, White Collection and 'One'. Concept and White Collection have a range of profiles for skirting, dado and picture rails and architrave, while the innovative One collection makes it easy to use a single profile for a variety of applications.

Ornamental mouldings

A range of finely crafted carved profiles, intricately detailed embossed profiles and beautiful ornaments and corbels, these are ideal for adding a unique finishing touch. They can be used for all sorts of things – decorating a fireplace, making picture frames, revitalising old furniture – as well as giving a room a period style or a contemporary look.

Carved mouldings are finely crafted to give a detailed definition. Profiles are carved from a range of high quality timbers to create designs of distinction.

Embossed mouldings – a time-honoured tradition, using state-of-the-art technology to achieve consistent and intricate detailing.
